Lakshman Shaminthan

Software Engineer — Full-Stack Developer

+94 76 448 1576 | lakshmanshaminthan@gmail.com | lshaminthan.github.io | LinkedIn | GitHub

Summary

Computer Science and Engineering graduate with hands-on experience as a full-stack engineer, having built features across React/Next.js frontends, Node.js and Python backends, and MongoDB during my time at Cogntix, where I developed an AI-powered interview scheduling system. Currently engaged as a freelance full-stack developer on LankaRoute, an AI trip-planning platform. A quick learner looking to bring this hands-on product-building experience to a software engineering role.

Education

National Institute of Technology, Rourkela **September 2022 – May 2026**

Bachelor of Technology in Computer Science and Engineering (First Class) *Rourkela, Odisha*

- **ICCR Scholar** – awarded a full scholarship by the Government of India (Indian Council for Cultural Relations).

Jaffna Hindu College **December 2020**

Secondary School (Science Stream) *Jaffna, Sri Lanka*

Experience

Cogntix

Software Engineer Intern *Jan 2026 – Jul 2026*

- Full-stack developer on **PACC**, an eBook-selling platform with **Publisher, Admin, and Reader portals**.
- **Frontend:** Developed responsive user interfaces using **React and Next.js**.
- **Backend:** Built **Node.js** services with **REST API integration** for internal and third-party services, and **payment gateway integration**.
- **Database:** Designed and managed application data using **MongoDB** for efficient storage and retrieval.

Research and Development Intern *May 2025 – Jul 2025*

- Developed an **Automated Interview Scheduling System** to streamline candidate outreach and recruiter scheduling.
- Built backend services using **Python, FastAPI, and MongoDB** for email automation and scheduling workflows.
- Integrated **AWS SES, SNS, and S3** for sending emails, real-time notifications, and email storage.
- Connected **Google Calendar API** to fetch recruiter availability and manage scheduling conflicts.
- Utilized **AI APIs (NLP models)** to analyze candidate emails for sentiment, date, and time availability.

Freelance Experience

LankaRoute – AI Trip Planning Platform

Full-Stack Developer *Jul 2026 – Present*

- Led a 3-person team as full-stack developer to build an AI-powered trip-planning platform for Sri Lanka.
- Architected a **Next.js** frontend (for SEO) and a serverless backend on **Node.js, SST, AWS Lambda, and DynamoDB**.
- Designed a multi-step, card-based itinerary wizard guiding users from interest selection to a personalized, AI-generated itinerary.
- Deployed a live prototype and directed the team's technical architecture and design system.

Menuaura – Restaurant SaaS Platform *TypeScript, AWS Lambda, DynamoDB, PayHere, SST*

Full-Stack Developer (Team of 4)

- Co-building a subscription-based SaaS platform that gives restaurants **QR-code digital menus**, customer reviews, and promotions.
- Own the **PayHere payment gateway integration**, handling the full subscription lifecycle: activation, renewal, and cancellation.
- Built a secure, **idempotent (duplicate-safe) webhook** that verifies payments and prevents double-processing.
- Developed serverless backend logic in **TypeScript** on **AWS Lambda and DynamoDB**, deployed with **SST**.

Projects

AI Legal Document Analyzer (RAG) | *FastAPI, Legal-BERT, Gemini LLM, ChromaDB, FAISS*

- Built an AI platform that summarizes legal documents, highlights key clauses, and flags potential risks for users.
- Implemented a **Retrieval-Augmented Generation (RAG)** chatbot that answers context-aware questions on contracts.
- Generated **Legal-BERT** embeddings and used **ChromaDB and FAISS** for fast semantic search over document chunks.
- Integrated **Gemini LLM** through a **FastAPI** backend to produce clear answers grounded in the retrieved clauses.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C, C++

Frontend/Backend: React, Next.js, HTML, CSS, Tailwind CSS, Flutter, Node.js, FastAPI, Express

Databases & Cloud: MongoDB, MySQL, DynamoDB, AWS (S3, SES, SNS, Lambda), Firebase

AI/ML: RAG, LLM Integration (OpenAI, Anthropic, Gemini), Vector Databases (ChromaDB, FAISS), Legal-BERT

Other: REST API Development, Postman, Git, SST, WordPress, MATLAB

Achievements, Certifications & Activities

- **Python for Beginners, University of Moratuwa** Sep 2024
- **IELTS** – Overall Band Score 6 May 2022
- **Member, Gavel Club (Uki Coding School)** – leadership and public speaking workshops Feb 2022 – Sep 2022
